PROFESSIONAL SUMMARY

React.js Developer with professional experience developing and maintaining ERP and CRM applications at Alpha ERP. Skilled in building scalable web applications, integrating RESTful APIs, developing reusable UI components, and optimizing application performance. Strong foundation in JavaScript, React.js, MERN Stack, Data Structures and Algorithms, and Object-Oriented Programming. Passionate about building efficient software solutions and delivering high-quality user experiences.

EDUCATION

Government Engineering College, Gandhinagar
CGPA: 8.37/10

2022 – 2026 Bachelor of Engineering in Computer Engineering

EXPERIENCE

Alpha ERP

Ahmedabad, Gujarat React.js Developer

Jan 2026 – Jul 2026

- Developed enterprise-level **ERP** and **CRM** applications using React.js and integrated RESTful APIs.
- Built modules for **License Key Management**, **Software Release Management**, and **Database Update Automation**.
- Developed reusable React components, optimized application performance, and collaborated with backend developers to deliver scalable business solutions.
- Technologies:** React.js, JavaScript, HTML5, CSS3, Bootstrap, REST APIs, Git, GitHub

PROJECTS

HRM – Human Resource Management System | React.js

AlphaERP Project

- Developed a modern and responsive Human Resource Management (HRM) system frontend using React.js.
- Implemented core HR modules including Company, Branch, Department, Designation, Holiday Master, and Employee Management etc.
- Designed reusable UI components such as dynamic form renderer, custom data grid, responsive modal system,, and form validation for an enterprise-grade user experience.
- Tech Stack:** React.js, Tailwind CSS, JavaScript, REST API

Rentify – Airbnb Clone | MERN Stack

College Project

- Built a full-stack Airbnb-like platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented secure authentication with Passport.js; applied server-side and client-side validation to ensure data integrity.
- Integrated Mapbox for dynamic hotel location mapping and built a review system for user-specific feedback.
- Tech Stack:** Node.js, Express.js, MongoDB, EJS, CSS, REST API

E-Farmer – Online Platform for Farmers | MERN Stack

Hackathon Project

- Developed a full-stack platform for farmers to access agricultural products, crop prices, and government subsidies.
- Built an online marketplace for seeds, pesticides, and farming tools with a crop price checking feature.
- Added a government subsidy section to help farmers find available financial support.
- Tech Stack:** Node.js, Express.js, MongoDB, EJS, Bootstrap, REST API

TECHNICAL SKILLS

Frontend Development: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, JavaScript

Databases: MongoDB, MySQL

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving

Developer Tools: Git, GitHub, Postman, VS Code
